

Electrical Installation Condition Report

Requirements for Electrical Installations - BS 7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

Guidance for recipients:

This report is an important and valuable document which should be retained for future reference.

- 1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may limitations of this inspection, be fully identified. Such give rise to danger (see Section K).
- 2. This Report is only valid if accompanied by the Inspection Schedule(s) and the Schedule(s) of Circuit Details and Test Results.
- 3. The person ordering the Report should have received the original Report and the inspector should have retained a duplicate.
- 4. The original Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner / occupier with details of the condition of the electrical installation at the time the Report was issued.
- 5. Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.
- 6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.
- 7. For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at confirm it is in operational condition in accordance with risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.
- 8. For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

- 9. Where it has been stated in Section K that an observation requires further investigation code FI the inspection has revealed an apparent deficiency which may result in a code C1 or C2 could not, due to the extent or observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).
- 10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit /distribution board (where required).
- 11. Where the installation includes a residual current device (RCD) it should be tested six-monthly by pressing the button marked 'T' or 'Test'. The device should switch off the supply and should then be switched on to restore the supply. If the device does not switch off the supply when the button is pressed, seek expert advice. For safety reasons it is important that this instruction is followed.
- 12. Where the installation includes an arc fault detection device (AFDD) having a manual test facility it should be tested six-monthly by pressing the test button. Where an AFDD has both a test button and automatic test function, manufacturer's instructions shall be followed with respect to test button operation.
- 13. Where the installation includes a surge protective device (SPD) the status indicator should be checked to manufacturer's information. If the indication shows that the device is not operational, seek expert advice. For safety reasons it is important that this instruction is followed.
- 14. Where the installation includes alternative or additional sources of supply, warning notices should be found at the origin or meter position or, if remote from the origin, at the consumer unit or distribution board and at all points of isolation of all sources of supply.

ELECTRICAL INSTALLATION CONDITION REPORT

FT/EICR 6522000001896

for Industrial/Commercial Premises

Requirements for Electrical Installations BS 7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

Supply Cha	aracteristics and Earthing Arrangements										
	Earthing Arrangements TN-S TN-C-S TT Other	Please specify									
Number 8	Type of live conductors AC 🗸 DC No. of phases 3	No. of wires 4									
Nature of	Supply Parameters (Note: (1) by enquiry, (2) by enquiry or by measure	ement)									
	Nominal voltage, U/U ₀ ⁽¹⁾ 230/400 v Nominal	frequency, f ⁽¹⁾ 50 H _z Confirmation of supply polarity \checkmark									
Pro	Prospective fault current, $I_{pf}^{(2)}$ 2.2 kA External loop impedance, $Z_e^{(2)}$ 0.23 Ω										
Supply	Protective Device BS (EN) 1361 Fuse HBC 2 Type 2	Rated Current 100 A									
No. of Add	ditional Supplies N/A										
Particulars	of Installation Referred to in this Report	Means of Earthing									
Details of Location	Finstallation Earth Electrode (where applicable) Type (e.g. rod(s), tape e Electrode resistance to ea	,									
	Main Protective Conductors Material csa	(√) or Value (√) or Value									
	Earthing Conductor Copper 16 mm										
	Protective Bonding Conductor Copper 10 mm	Continuity Verified \checkmark Ω Connection Verified \checkmark Ω									
	Material csa										
		connection / continuity) (\sqrt{)} or Value (\sqrt{)} or Value									
	h Location By roller door	Water installation									
If RCD mai	e rating or setting 60 A Voltage rating 400 V n switch: Rated residual operating current I Δn 100 mA	Gas installation pipes \blacksquare \square \square To lightning protection \blacksquare \square \square									
II KCD mai	n switch: Rated residual operating current I Δn 100 mA	Oil installation pipes ΝΑ Ω Other Ω Ω									
BS(EN) 88	3-2 Fuse HRC G No. of Poles 3 Current Rating 60 A	Rated time delay N/A ms Measured operating trip time ms									
Observati	ons	Explanation of codes									
	to the attached inspection schedule(s) and schedule(s) of circuit details and	Danger present. Risk of Injury. Immediate remedial action required.									
	is, and subject to the limitations specified at the Extent and limitations of and testing Section D.	Potentially dangerous. Urgent remedial action required.									
	·										
No r	emedial work required	Improvement recommended.									
✓ The	following observations are made	Further Investigation required without delay									
Item No.	Observations	Code									
1	5.5 Condition of enclosure(s) in terms of IP rating etc (416.2)- Three phase shows gap to main busbar	board missing blank, and rewireable board missing fuses cover which									
2	5.14 RCD(s) provided for additional protection / requirements, where requirewireable board, no RCD protection for sockets on three phase board	ed - includes RCBO(s) (411.3.3; 415.1)- only 100mA RCD covering									
3	5.16 Presence of diagrams, charts or schedules at or near equipment, whe	re required (514.9.1)- poor labelling on boards									
4	5.22 Protection against mechanical damage where cables enter equipment entering trunking for main tails, and final circuits cables	(522.8.1; 522.8.5; 522.8.11)- No grommet protection on some cables									
5	5.23 Protection against electromagnetic effects where cables enter ferroma individual holes	gnetic enclosures (521.5.1) Tails going from switch fuse to RCD go through									
6	8.12.1 For all socket-outlets of rating 32 A or less unless an exception is pe persons (BA1, BA3) and children (BA2, BA3) - can be used to supply equip										
7	8.12.2 For the supply of mobile equipment not exceeding 32 A rating for us	e outdoors (411.3.3)-RCD protection provided exceeds 30 mA									
8	9.18 Condition of accessories including socket-outlets, switches and joint b	oxes (651.2 (v))-Socket faces with no isolation switches on them									
	e following codes, as appropriate, has been allocated to each of the observa le for the installation the degree of urgency for remedial action.	tions made above and/or any attached observation sheets to indicate to the person(s)									
O Dar	ger present. Risk of Injury. Immediate remedial action required.										
Pot	entially dangerous. Urgent remedial action required.	1, 2, 4, 5, 6, 7, 8									
Imp	rovement recommended.	3									
Fur	ther Investigation required without delay

		W
m No.	Description	Outcor
INTAKE	EQUIPMENT (VISUAL INSPECTION ONLY);	
1.1	Service cable	
1.1.1	Service head	
1.1.2	Earthing arrangement	
1.1.3	Meter tails	
1.1.4	Metering equipment	
1.1.5	Isolator (where present)	
1.1.6	Person ordering work/dutyholder notified (Delete as appropriate) NOTE 1 Where inadequacies in the intake equipment are encountered, which may result in a dangerous or potentially dangerous situation, the person ordering the work and/or dutyholder must be informed. It is strongly recommended that the person ordering the work informs the appropriate authority. NOTE 2 For this section only, where inadequacies are found, an X should be put against the appropriate item and a comment made in Section K	
1.2	Consumer's Isolator (where present)	
1.3	Consumer's meter tails	
0 PRESE	NCE OF ADEQUATE ARRANGEMENTS FOR PARALLEL OR SWITCHED ALTERNATIVE SOURCES	
2.1	Adequate arrangements where a generating set operates as a switched alternative to the public supply (551.6)	N/A
2.2	Adequate arrangements where a generating set operates in parallel with the public supply (551.7)	(N/A
0 AUTON	ATIC DISCONNECTION OF SUPPLY	
3.1	Main earthing/bonding arrangements (411.3; Chap 54)	
3.1.1	Presence of distributor's earthing arrangement (542.1.2.1; 542.1.2.2)	Q
3.1.2	Presence of installation earth electrode arrangement (542.1.2.3)	N/
3.1.3	Adequacy of earthing conductor size (542.3; 543.1.1)	
3.1.4	Adequacy of earthing conductor connections (542.3.2)	
3.1.5	Accessibility of earthing conductor connections (543.3.2)	
3.1.6	Adequacy of main protective bonding conductor sizes (544.1)	
3.1.7	Adequacy and location of main protective bonding conductor connections (543.3.2; 544.1.2)	
3.1.8	Accessibility of all protective bonding connections (543.3.2)	
3.1.9	Provision of earthing/bonding labels at all appropriate locations (514.13)	Ž
3.2	FELV - requirements satisfied (411.7; 411.7.1)	(N/F
	METHODS OF PROTECTION (where any of the methods listed below are employed details should be provided on se	
neets)		
4.1	Non-conducting location (418.1)	N/
4.2	Earth-free local equipotential bonding (418.2)	N/A
4.3	Electrical separation (Section 413; 418.3)	N/A
4.4	Double insulation (Section 412)	N/
4.5	Reinforced insulation (Section 412)	(N/
0 DISTRII	BUTION EQUIPMENT	
5.1	Adequacy of working space/accessibility to equipment (132.12; 513.1)	Q
5.2	Security of fixing (134.1.1)	
5.3	Condition of insulation of live parts (416.1)	<u> </u>
5.4	Adequacy/security of barriers (416.2)	Q
5.5	Condition of enclosure(s) in terms of IP rating etc (416.2)	<u> </u>
5.6	Condition of enclosure(s) in terms of fire rating etc. (421.1.6; 421.1.201; 526.5)	
5.7	Enclosure not damaged/deteriorated so as to impair safety (651.2)	N/
5.8	Presence and effectiveness of obstacles (417.2)	N/
5.9	Presence of main switch(es), linked where required (462.1; 462.1.201; 462.2)	
5.10	Operation of main switch(es) (functional check) (643.10)	
5.11	Manual operation of circuit-breakers RCDs and AFDDs to prove functionality (643.10)	
5.12	Confirmation that integral test button/switch causes RCD(s) to trip when operated (functional check) (643.10)	
5.13	RCD(s) provided for fault protection – includes RCBO(s) (411.4.204; 411.5.2; 531.2)	Q
5.14	RCD(s) provided for additional protection / requirements, where required - includes RCBO(s) (411.3.3; 415.1)	<u></u>
5.15	Presence of RCD six-monthly test notice at or near equipment, where required (514.12.2)	
5.16	Presence of diagrams, charts or schedules at or near equipment, where required (514.9.1)	(
5.17	Presence of alternative supply warning notice at or near equipment, where required (514.15)	N/A
5.18	Presence of next inspection recommendation label (514.12.1)

FT/EICR

5.20	Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal	
5.21	damage, arcing or overheating)(411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	
	BUTION EQUIPMENT CONT.	
5.22	Protection against mechanical damage where cables enter equipment (522.8.1; 522.8.5; 522.8.11)	(2)
5.23	Protection against electromagnetic effects where cables enter ferromagnetic enclosures (521.5.1)	<u> </u>
	BUTION CIRCUITS	
6.1	Identification of conductors (514.3.1)	
6.2	Cables correctly supported throughout their run (521.10.202; 522.8.5)	2
6.3	Condition of insulation of live parts (416.1)	
6.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking. (521.10.1)	
6.5	Suitability of containment systems for continued use (including flexible conduit) (Section 522)	
6.6	Cables correctly terminated in enclosures (Section 526)	
6.7	Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are	Ø
	tight and secure (526.1)	
6.8	Examination of cables for signs of unacceptable thermal or mechanical damage/deterioration (421.1; 522.6)	<u> </u>
6.9	Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523)	
5.10	Adequacy of protective devices: type and rated current for fault protection (411.3)	
5.11	Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1)	
5.12	Coordination between conductors and overload protective devices (433.1; 533.2.1)	
5.13	Cable installation methods/practices with regard to the type and nature of installation and external influences (Section 522)	
6.14 CARL	Where exposed to direct sunlight, cable of a suitable type (522.11.1)	NA NA
	ES CONCEALED UNDER FLOORS, ABOVE CEILINGS, IN WALLS/PARTITIONS LESS THAN 50 MM FROM A SURFACE, AI IS CONTAINING METAL PARTS	או טא
.15.1	Installed in prescribed zones (see Section D. Extent and limitations) (522.6.202)	
	Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical	
.15.2	damage by nails, screws and the like (see Section D. Extent and limitations) (522.6.204)	
3.16	Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	
3.17	Band II cables segregated/separated from Band I cables (528.1)	N/A
3.18	Cables segregated/separated from non-electrical services (528.3)	N/A
6.19	Condition of circuit accessories (651.2)	
3.20	Suitability of circuit accessories for external influences (512.2)	
3.21	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	
5.22	Adequacy of connections, including cpc's, within accessories and to fixed and stationary equipment – identify/ record numbers and locations of items inspected (Section 526)	
5.23	Presence, operation and correct location of appropriate devices for isolation and switching (Chapter 46; Section 537)	
3.24	General condition of wiring systems (651.2)	\bigcirc
3.25	Temperature rating of cable insulation (522.1.1; Table 52.1)	
CONSL	JMER UNIT/DISTRIBUTION BOARD	
7.1	Adequacy of working space / accessibility to consumer unit/distribution board (132.12; 513.1)	$\overline{\mathbb{Q}}$
7.2	Security of fixing (134.1.1)	<u> </u>
7.3	Condition of enclosure(s) in terms of IP rating (barriers etc.)(416.2)	V
7.4	Condition of enclosure(s) in terms of fire rating etc (421.1.6; 421.1.201; 526.5)	⊘
7.5	Enclosure not damaged/deteriorated so as to impair safety (651.2)	Ø
7.5.1	Presence and effectiveness of obstacles (417.2)	Q
7.6	Presence of main switch(es), linked where required (462.1; 462.1.201; 462.2)	Ø
7.7	Operation of main switch(es) (functional check) (643.10)	<u> </u>
7.8	Manual operation of circuit-breakers, RCD(s) and AFDD's to prove functionality (643.10)	2
	Correct identification of circuit details and protective devices (514.8.1; 514.9.1)	<u> </u>
7.10	Presence of RCD six-monthly test notice at or near equipment, where required (514.12.2)	<u> </u>
7.10 7.11	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15)	
7.10 7.11	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514)	2
7.10 7.11 7.12 7.13	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433)	8
7.10 7.11 7.12 7.13 7.14	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3))	
7.9 7.10 7.11 7.12 7.13 7.14 7.15	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3)) Protection against mechanical damage where cables enter distribution board (522.8.1; 522.8.5; 522.8.11)	
7.10 7.11 7.12 7.13 7.14 7.15 7.16	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3)) Protection against mechanical damage where cables enter distribution board (522.8.1; 522.8.5; 522.8.11) Protection against electromagnetic effects where cables enter distribution board (521.5.1)	
7.10 7.11 7.12 7.13 7.14 7.15 7.16	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3)) Protection against mechanical damage where cables enter distribution board (522.8.1; 522.8.5; 522.8.11) Protection against electromagnetic effects where cables enter distribution board (521.5.1) RCD(s) provided for fault protection – includes RCBO(s)(411.4.204; 411.5.2; 531.2)	
7.10 7.11 7.12 7.13 7.14 7.15 7.16 7.17	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3)) Protection against mechanical damage where cables enter distribution board (522.8.1; 522.8.5; 522.8.11) Protection against electromagnetic effects where cables enter distribution board (521.5.1) RCD(s) provided for fault protection – includes RCBO(s)(411.4.204; 411.5.2; 531.2) RCD(s) provided for additional protection/requirements, where required - includes RCBO(s) (411.3.3; 415.1)	
7.10 7.11 7.12 7.13 7.14 7.15 7.16	Presence of alternative supply warning notice at or near consumer unit/distribution board (514.15) Presence of other required labelling (Please specify) Section 514) Compatibility of protective devices, bases and other components; correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Sections 432; 433) Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.3)) Protection against mechanical damage where cables enter distribution board (522.8.1; 522.8.5; 522.8.11) Protection against electromagnetic effects where cables enter distribution board (521.5.1) RCD(s) provided for fault protection – includes RCBO(s)(411.4.204; 411.5.2; 531.2)
